

Read Data from a Text File

Tabulated Data are often stored and shared using text files, either with `.csv` or `.txt` file extension. These files can be opened with Notepad or Microsoft Excel.

`.csv` is known as
comma-separated values

abc - Notepad

File	Edit	Format
John,M, 54		
Mary,F, 7		
Jane,F, 38		
Peter,M, 100		
Marcus,M, 42		
Ali,M, 62		
Siti,F, 71		

	A	B	C	
1	John	M	54	
2	Mary	F	7	
3	Jane	F	38	
4	Peter	M	100	
5	Marcus	M	42	
6	Ali	M	62	
7	Siti	F	71

Read Data from a Text File

```
file = open('data.csv')

lines = file.readlines()           # read file
for line in lines[1:]:             # skip the header
    line = line.strip()             # remove the newline
    line = line.split(',')          # split by commas
    [name, gender, score] = line
    print(name, score)

file.close()                       # close file
```
